

# Comfort Concerns<sup>®</sup>

*There are 100's of ways to install a comfort system,  
the best way is what's best for you and your family...*

Low	Med	High	Benefits Wanted	Solution
			Are there any areas that get too warm ... or too cold?	
			Does anyone in your family suffer from asthma or airborne allergens?	
			Does your home get too muggy or too dry certain times of the year?	
			Is the outdoor unit accessible to children or pets?	
			Is the existing system noisy ... Indoor? Outdoor?	
			What repairs have been done on the system? Exceptional reliability / warranty?	
			Are you concerned about future energy costs?	
			What is most important to you when choosing a company to do business with?
